

The **AV-WS** is a portable unlit wind cone providing pilots with surface wind conditions during operations on and near the airfield.

Key Features:

- Lightweight and Durable
- Rugged Construction to Sustain a Variety of Weather Conditions
- Rapid Set Up and Disassembly

Features

- All nine anodized, powder coated pieces store in a rugged transport case for convenient storage.
- All required tools and hardware are included in case.
- Chafe cap included for windsock support arm prevents unnecessary windsock wear.
- Minimizes damage risk to aircraft and maintenance vehicles.

Applications

- Provides pilots with surface wind conditions
- Suitable for portable/temporary airfields and heliports
- Supplemental indicator at large airfields
